ENGAGING POTENTIAL CONTRACTING ORGANIZATIONS REPORT

1. INTRODUCTION

This report presents the outcome of the corporate and institutional outreach exercise conducted on behalf of Epahubb Consult. The exercise aimed to identify potential customers, introduce Epahubb's solutions, engage relevant decision-makers, and establish opportunities for future business relationships.

A total of 40 organizations were included in the outreach exercise across the education, hospitality, retail, healthcare and service sectors. Engagements were conducted through physical visits and telephone calls.

The education sector produced the strongest opportunities, particularly among schools that showed willingness to discuss their existing administrative systems and possible improvements.

2. OUTREACH RESULTS

The outreach exercise covered 40 organizations. Some expressed interest in further discussions, while others already had existing systems, were not ready to adopt new solutions, or did not show interest.

The five schools below have been selected as the priority institutional prospects because their engagements presented the clearest opportunities for further discussions.

2.1 Priority Institutional Prospects

Organization	Decision-maker contacted	Engagement outcome	Follow-up
Lighthouse Preparatory School	Headmaster	Has an existing system but identified the lack of integrated payment functionality? Interested in discussing an all-in-one solution.	11 Nov 2026
Marthin Luther Complex	Headmaster	Requested that the system be brought for a meeting and demonstration involving the headmaster and teachers.	10 Nov 2026
Saint Paul's International School	Headmaster	Expressed interest in Epahubb's solution and agreed to further discussions.	12 Nov 2026
Emmanuel Presby Academy	ICT Teacher	The headmaster was unavailable during the visit. The ICT teacher requested that I return for further engagement.	11 Nov 2026

Belge Hopeland Educational Complex	Headmaster	The headmaster indicated that he needed to discuss the solution with the proprietor before proceeding.	14 Nov 2026

These organizations represent potential business opportunities and are not yet confirmed customers. Further engagement, system demonstrations and management discussions will be required before any contract can be secured.

3. OTHER BUSINESS OPPORTUNITIES IDENTIFIED

Apart from the five priority schools, the outreach exercise also identified other organisations with possible business or collaboration opportunities.

- **Frimpong Laundry:** The owner expressed interest in collaboration and indicated that he has an IT background. Further discussion is expected on 10 November 2026.
- **Next Level Beauty Salon:** The owner expressed interest in further discussions about possible technology solutions. Follow-up is scheduled for 12 November 2026.
- **Anagen Haircare:** The owner/manager showed interest in having an e-commerce website but considered the cost expensive. I proposed that the business join KromOnline, Epahubb's marketplace, where sellers can register and sell without paying a website development fee. Follow-up is scheduled for 13 November 2026.
- **Boyos Bite Restaurant:** The assistant manager expressed interest and indicated that he would discuss the opportunity with the manager. Follow-up is scheduled for 13 November 2026.

Other engagements included organizations that already use existing systems, were not interested, or could not make a decision during the initial contact.

4. ESTIMATED CONTRACT VALUES

The following estimates were prepared for the five priority schools using Epahubb's existing pricing structure and the estimated student populations.

Priority organization	Estimated monthly contract value
Lighthouse Preparatory School	GHS 6,000
Marthin Luther Complex	GHS 3,000
Saint Paul's International School	GHS 500
Emmanuel Presby Academy	GHS 600
Belge Hopeland Educational Complex	GHS 600
Total	**GHS 10,700**

The combined estimated monthly value of the five opportunities is **GHS 10,700**. If all five opportunities are converted into contracts and maintained for 12 months, the potential annual recurring revenue would be **GHS 128,400**.

These figures are preliminary estimates, not approved quotations or confirmed contract amounts. Final pricing will depend on the schools' actual student populations, required modules, implementation needs and any agreed commercial terms.

5. FOLLOW-UP AND ENGAGEMENT PLAN

The immediate priority is to continue discussions with the five schools, demonstrate the system where requested and establish the requirements for possible adoption.

Organization	Planned date	Immediate action
Marthin Luther Complex	10 Nov 2026	Demonstrate the system to the headmaster and teachers.
Lighthouse Preparatory School	11 Nov 2026	Discuss the payment integration requirement and other system needs.
Emmanuel Presby Academy	11 Nov 2026	Return and engage the headmaster.
Saint Paul's International School	12 Nov 2026	Continue discussions and establish the school's requirements.
Belge Hopeland Educational Complex	14 Nov 2026	Follow up on the headmaster's discussion with the proprietor.

During these engagements, I will also establish whether the schools are willing to receive formal quotations and technical proposals. Their actual requirements, procurement procedures, available budgets and expected decision dates will be confirmed where possible.

6. FORMAL QUOTATIONS AND TECHNICAL PROPOSALS

At the time of preparing this report, formal quotations and technical proposals have not yet been requested or submitted to the five priority schools. The intention is to establish each school's specific needs during the follow-up discussions before preparing and presenting appropriate documents.

7. CHALLENGES ENCOUNTERED

The outreach exercise presented a few challenges:

1. **Existing systems:** Several organizations already use software solutions and are not actively considering a change of provider.
2. **Access to decision-makers:** In some cases, the owners, managers or headmasters were unavailable, requiring additional visits or calls.

3. **Price sensitivity:** Some businesses expressed interest in technology solutions but considered the cost a major concern.
4. **Transportation and time:** Moving between different organizations required considerable time and transportation expenses.

8. RECOMMENDATIONS

Based on the outcome of the exercise, I recommend that Epahubb Consult gives greater attention to the education sector. The five priority schools provide a reasonable starting point for further engagement, especially through demonstrations that allow school management and teachers to understand the system's practical benefits.

The company should also:

- Prepare clear and professional demonstrations for interested schools.
- Establish each school's actual requirements before preparing quotations.
- Follow up consistently with decision-makers.
- Explore affordable entry-level solutions for smaller businesses.
- Continue developing collaboration opportunities with interested technology businesses.

9. CONCLUSION

The outreach exercise successfully covered 40 organizations and identified several opportunities for further engagement. The five priority schools provide the strongest institutional prospects, with a combined preliminary estimated monthly contract value of GHS 10,700.

Although no contracts have been secured at this stage, the scheduled follow-ups provide an opportunity to demonstrate Epahubb's solutions, understand the organization’s needs and move suitable prospects towards formal quotations and technical proposals.

The next phase will focus on converting these initial discussions into properly qualified business opportunities and, where possible, securing new customers for Epahubb Consult.
