MARKET RESEARCH AND CUSTOMER SEGMENT IDENTIFICATION REPORT

1. Executive Summary

This report identifies ten potential customer segments for Epahubb Consult and examines their business needs, challenges, potential decision-makers and commercial opportunities.

The research combines two approaches:

- Primary research: Direct conversations with six organizations. Five remain interested in exploring Epahubb's solutions, while one has indicated that it is not interested at this stage.
- Secondary research: Review of Epahubb's service offering, public business information, company websites and business directories to identify additional potential prospects.

The six organizations from the primary research are Saint Paul's International School, Maggiefrimps Company Limited, Boyos Bite Restaurant, Next Level Beauty Parlour, G's Sip and Bite, and Peesis Services.

Five of these organizations have expressed interest and requested product demonstrations. Saint Paul's International School considers the price quoted acceptable, although no purchase commitment has been made. The other interested organizations have not discussed budgets. Maggiefrimps Company Limited is not currently interested.

The findings indicate opportunities for Epahubb in education management, inventory management, hospitality ordering systems, business websites, healthcare administration, distribution, manufacturing, logistics, financial services and professional services.

The immediate commercial priority is to demonstrate the relevant solutions to interested prospects, establish their requirements and purchasing authority, and obtain a decision on whether to proceed to a quotation.

2. Company Background

Epahubb Consult is a technology and consultancy business based in Kumasi, Ghana. Its website presents its services as helping organisations improve efficiency, security and business growth through technology.

Its advertised services include:

- IT strategy and consulting
- Software and web development

- Mobile application development
- UI/UX design
- Cybersecurity
- Network solutions
- IT integration and deployment
- Graphics design
- Custom software solutions

Its website also presents project categories including school management systems, e-commerce websites, trading platforms, CRM systems, mobile applications and fintech platforms.

Innovative Product Engineering

These capabilities provide a foundation for approaching organisations that need to digitise administrative processes, improve customer access, manage operations or automate business activities.

3. Research Methodology

The research uses two sources of information.

Primary research

Information obtained through direct conversations with representatives of six businesses. Their reported problems and interest levels are treated as findings from those conversations.

Secondary research

Publicly available information from company websites, business directories and other sources. These sources help identify additional prospects and assess their publicly visible operations.

A distinction is maintained between:

- Confirmed problems reported directly by a business representative.
- Potential needs inferred from an organisation's business activities.
- Information that still requires confirmation during a sales meeting.

No prospect is treated as a confirmed paying customer unless a purchase commitment is obtained.

4. Customer Segment Analysis

The following ten segments represent potential markets for Epahubb's services.

4.1 Education – Schools and Educational Institutions

Potential customers: Private basic schools, secondary schools, vocational institutions and colleges.

Needs and challenges

- Student record management.
- Attendance tracking.
- Examination and assessment management.
- Automated result calculations and report generation.
- Fee tracking and parent communication.
- Online school information and admission enquiries.

Potential decision-makers: Proprietors, school directors, headmasters, headteachers, school administrators and IT coordinators.

Epahubb opportunity: School management systems, websites, parent portals and customised education software.

Identified prospects

Organisation	Location / contact	Research status
Saint Paul's International School	Contact: Headmaster; 0244673756	Directly contacted; approximately 50 students; manual attendance and score recording confirmed
Palmar International School	68 Samuel Sarpong Drive, Kumasi; 024 632 7201	Additional research-identified prospect
Maria Montessori of Kumasi	Odeneho Kwadaso, Kumasi; 027 788 9923	Additional research-identified prospect
Stepping Stone Christian School	Adum, Kumasi; 032 249 9887	Additional research-identified prospect

The public listings provide contact details for the additional schools, but their software needs and purchasing interest have not been confirmed.

google.com+2

Commercial assessment: Saint Paul's is an immediate demonstration opportunity. The school estimates its student population at 50 and considers the price already quoted acceptable. The headmaster's final purchasing authority and the school's ability to proceed still need confirmation.

4.2 Retail, Wholesale and Distribution

Potential customers: Supermarkets, wholesalers, distributors, pharmacies and general merchandise businesses.

Needs and challenges

- Stock and inventory monitoring.
- Recording incoming and outgoing goods.
- Tracking damaged, missing or expired stock.
- Sales and purchase records.
- Supplier and customer management.
- Stock reporting across branches or warehouses.

Potential decision-makers: Managing directors, business owners, operations managers, inventory managers, finance managers and IT managers.

Epahubb opportunity: Inventory management systems, POS integration, CRM, reporting dashboards and customised business software.

Identified prospects

Organisation	Location / contact	Research status
Maggiefrimps Company Limited	Contact: RTI Manager / IT Head	Directly contacted; lack of inventory system and missing goods reported; currently not interested
NAN Company Limited	Asokwa Industrial Area, Kumasi; +233 32 202 5389 / +233 32 203 0909; info@nancompany.com	Additional research-identified prospect
Giant Group of Companies	Kumasi; +233 322 004 056 / +233 50 158 5436; info@giantsafrica.com	Additional research-identified prospect
Clemonic Company Limited	Adankwame, Barekese Road, Kumasi; +233 26 497 5167	Additional research-identified prospect

NAN reports more than 30 years of experience, over 1,000 business partners and more than 100 team members. Giant Group describes its activities as including FMCG, commodity trading and logistics, with more than 100 employees. Clemonic describes its business as building-material distribution and haulage. These are indicators of operational scale, not proof that the companies currently need or will purchase new software.

nangroupgh.com+2

Commercial assessment: Maggiefrimps is a documented sales opportunity but should be excluded from the active interested-prospect pipeline for now. NAN and Giant Group are worth approaching because of their distribution operations and potential inventory, warehouse and reporting requirements.

4.3 Hospitality – Restaurants, Hotels and Food Businesses

Potential customers: Restaurants, hotels, food vendors, cafés and catering businesses.

Needs and challenges

- Online food and beverage ordering.
- Menu presentation and updates.
- Online payments.
- Delivery coordination.
- Reservation and customer enquiries.
- Customer engagement and repeat business.

Potential decision-makers: Restaurant owners, hotel general managers, operations managers, marketing managers and IT managers.

Epahubb opportunity: Restaurant ordering websites, e-commerce solutions, booking systems, payment integration and business websites.

Identified prospects

Organisation	Location / contact	Research status
Boyos Bite Restaurant	Owner contacted; location and public contact to be verified	Directly contacted; interested and wants a demonstration
G's Sip and Bite	Owner contacted; location and public contact to be verified	Directly contacted; interested and wants a demonstration
Lancaster Kumasi City	Raintree Road, Kumasi; +233 30 824 9803	Additional research-identified prospect
Golden Bean Hotel	19 Harper Road, Nhyiaeso, Kumasi; +233 32 208 6000	Additional research-identified prospect
Ridge Condos Hotel	No. 1 Kwabena Sarpong Drive, Kumasi; +233 32 203 2274	Additional research-identified prospect

The three hotels are publicly listed hospitality businesses in Kumasi. Their current website, booking, ordering and internal software requirements should be assessed before making a proposal.

tripadvisor.com+2

Commercial assessment: Boyos Bite and G's Sip and Bite are the immediate demonstration prospects. Boyos Bite is interested but has not yet decided whether to proceed. G's Sip and Bite is also interested, but needs to see how the proposed solution would benefit the business.

4.4 Small and Medium-Sized Enterprises (SMEs) and Professional Services

Potential customers: Beauty parlours, salons, consultancies, repair businesses, agencies and other small businesses.

Needs and challenges

- Low online visibility.
- Limited access to new customers.
- Lack of professional websites.
- Difficulty showcasing products, services and previous work.
- Limited online enquiry channels.
- Manual business processes.

Potential decision-makers: Business owners, managing partners, general managers and marketing managers.

Epahubb opportunity: Business websites, online portfolios, booking systems, CRM and digital marketing support.

Identified prospect

Organisation	Contact	Research status
Next Level Beauty Parlour	Owner contacted	Directly contacted; limited exposure confirmed

Commercial assessment: The owner is interested in a demonstration and the business is considered capable of purchasing, but willingness is relatively low. The demonstration should focus on how a website or portfolio could help potential customers discover the business, view its work and make enquiries.

4.5 Healthcare – Hospitals, Clinics and Medical Centres

Potential customers: Private hospitals, clinics, diagnostic centres, pharmacies and medical suppliers.

Needs and challenges

- Patient record management.
- Appointment scheduling.
- Billing and payment records.
- Inventory management for medical supplies.
- Laboratory and diagnostic reporting.
- Secure access to sensitive information.

Potential decision-makers: Hospital administrators, medical directors, hospital owners, finance managers, procurement managers and IT managers.

Epahubb opportunity: Hospital management systems, appointment platforms, inventory systems, secure databases, websites and custom healthcare software.

Identified prospects

Organisation	Location / contact	Research status
Oak Specialist Hospital	Bek-Egg Hotel Road, Kumasi; +233 50 976 0659	Additional research-identified prospect
Asafo-Boakye Specialist Hospital	10 Dr Asafo Boakye Street, Kumasi; +233 32 200 2982	Additional research-identified prospect
Constant Hospital	Pankrono, Kumasi; +233 20 819 9068	Additional research-identified prospect
ADB Ghana Limited	Kumasi office, Asokwa; +233 244 114 636; info@adbghanamedicals.com	Additional research-identified prospect

Oak Specialist Hospital is listed as a private multispecialty hospital. Asafo-Boakye Specialist Hospital publicly describes itself as a 100-bed specialist hospital. ADB Ghana Limited is a medical equipment and supplies company with warehouse and logistics staff. These operational characteristics suggest possible software opportunities, but no specific IT problem has been confirmed with these organisations.

google.com+3

Commercial assessment: Private hospitals and medical suppliers may offer opportunities for customised software, but their requirements, existing systems, procurement procedures and budgets must be established through direct engagement.

4.6 Financial Services and Fintech

Potential customers: Rural banks, savings and loans companies, microfinance institutions, credit unions and fintech businesses.

Needs and challenges

- Customer account management.
- Secure transaction records.
- Digital payment integration.
- Customer onboarding.
- Reporting and reconciliation.
- Fraud prevention and cybersecurity.

Potential decision-makers: Managing directors, heads of operations, IT managers, digital banking managers, risk managers and compliance officers.

Epahubb opportunity: Secure web and mobile applications, payment integration, CRM, reporting systems and cybersecurity consulting.

Prospect identification: Rural banks and savings-and-loans institutions operating in Kumasi and other Ghanaian commercial centres should be researched and approached.

Commercial assessment: This segment may have substantial software needs, but financial institutions often have formal procurement, regulatory, security and compliance requirements. Epahubb should first establish its relevant experience, security capabilities and ability to meet those requirements before pursuing large projects.

4.7 Manufacturing and Agro-Processing

Potential customers: Food processors, beverage manufacturers, foam and mattress manufacturers, agricultural processors and industrial producers.

Needs and challenges

- Raw-material and finished-goods inventory.
- Production planning.
- Warehouse management.
- Sales and distribution tracking.
- Equipment maintenance records.
- Management reporting.

Potential decision-makers: Managing directors, factory managers, production managers, warehouse managers, finance managers and IT managers.

Epahubb opportunity: Inventory systems, production management software, ERP integrations, dashboards and custom applications.

Identified prospects

Organisation	Location / contact	Research status
Latex Foam Ghana – Kumasi Factory	Kaase Industrial Area, Kumasi; +233 24 436 9138	Additional research-identified prospect
NAN Company Limited	Asokwa Industrial Area, Kumasi	Also relevant to distribution and warehousing
Giant Group of Companies	Kumasi	Also relevant to commodity trading and logistics

Latex Foam's Kumasi factory is publicly listed as a manufacturing facility. NAN and Giant Group have substantial distribution or commodity-trading operations. These businesses are potential targets for operational software, but their actual software gaps remain unverified.

google.com+2

Commercial assessment: Manufacturing and distribution businesses may benefit from inventory, warehouse and reporting systems. Epahubb should identify a specific operational problem before proposing a solution.

4.8 Logistics and Transportation

Potential customers: Courier companies, transport operators, freight businesses, delivery companies and logistics providers.

Needs and challenges

- Shipment and delivery tracking.
- Customer and parcel records.
- Dispatch management.
- Route and delivery coordination.
- Fleet maintenance records.
- Online service enquiries and booking.

Potential decision-makers: Business owners, operations managers, fleet managers, logistics managers and IT managers.

Epahubb opportunity: Logistics management systems, tracking applications, customer portals, booking websites and fleet management software.

Identified prospects

Organisation	Location / contact	Research status
Peesis Services	Owner contacted; location and service details to be verified	Directly contacted; low exposure reported
Speedaf Express – Sofoline	Sofoline Bus Terminal, Kumasi; +233 24 417 1220	Additional research-identified prospect
DHL Service Point	504 Maxwell Road, Kumasi; +233 30 221 3090	Additional research-identified prospect
Giant Group of Companies	Kumasi; +233 322 004 056	Also relevant to logistics

Speedaf and DHL have publicly listed service points in Kumasi. Giant Group identifies logistics as one of its business areas. These are research-identified prospects, not confirmed buyers.

google.com+2

Commercial assessment: Peesis Services is an immediate demonstration opportunity for a professional website showcasing its services. Larger logistics operators may require more complex integrations and should be approached after identifying a specific need.

4.9 Non-Governmental Organisations and Training Institutions

Potential customers: NGOs, vocational training centres, foundations, skills development organisations and educational charities.

Needs and challenges

- Beneficiary and student records.
- Attendance and programme tracking.
- Training and assessment management.
- Donor and project reporting.
- Website and online information management.
- Communication with beneficiaries and stakeholders.

Potential decision-makers: Executive directors, programme managers, operations managers, training coordinators and IT officers.

Epahubb opportunity: Beneficiary management systems, training management platforms, websites, reporting dashboards and custom applications.

Identified prospect

Organisation	Public information	Research status
Opportunities Industrialization Centres Ghana (OICG)	Vocational training organisation with centres in several Ghanaian locations	Additional research-identified prospect

OICG is a potential prospect because of its training and programme administration activities. Its current software arrangements and willingness to purchase have not been established.

OICG+1

Commercial assessment: Training and NGO organisations may need systems to manage beneficiaries, attendance and reporting. Their purchasing capacity may depend on institutional funding, grants and project budgets.

4.10 Real Estate and Construction

Potential customers: Real estate developers, estate agencies, construction companies, building-material suppliers and property managers.

Needs and challenges

- Property listing and online marketing.
- Customer enquiries and lead tracking.
- Project progress reporting.
- Contractor and supplier management.
- Inventory of building materials.
- Customer relationship management.

Potential decision-makers: Managing directors, property developers, estate managers, project managers, sales managers and procurement managers.

Epahubb opportunity: Property listing websites, CRM platforms, project management software, inventory systems and mobile applications.

Identified prospects

Organisation	Public information	Research status
Clemonic Company Limited	Building-material distribution and haulage; Kumasi	Research-identified prospect
Macoba Luxury Apartments	Agyapongmaah Street, Kumasi; +233 50 203 0225	Research-identified hospitality/property prospect

Clemonic serves construction companies, contractors, retailers and individual builders. Macoba is listed as a serviced-apartment property. These organisations may be suitable for websites, enquiry management or operational software, but specific needs must be validated.

Building Materials Distribution · Kumasi, Ghana+1

5. Primary Research Findings: Six Directly Contacted Organisations

This section records the information obtained through direct conversations. It is the strongest evidence of immediate sales opportunities in the research.

5.1 Detailed prospect assessment

1. Saint Paul's International School

- Contact: Headmaster.
- Phone: 0244673756.
- Estimated student population: 50.
- Problem confirmed: Attendance and student scores are recorded manually. Calculating results and preparing final reports takes considerable time.
- Proposed solution: Epahubb School Management System.
- Interest: Interested; requested a demonstration.
- Price feedback: The school considers the price quoted acceptable.
- Budget: No formal budget commitment disclosed.
- Sales status:

  High-priority demonstration

- Next action: Demonstrate attendance, score entry, automated calculations and report generation. Establish the headmaster's purchasing authority and agree on the next step.

2. Maggiefrimps Company Limited

- Contact: RTI Manager / IT Head.
- Problem confirmed: The company does not have an inventory management system. Stock is recorded in books, contributing to missing goods.
- Proposed solution: Custom inventory management system.
- Interest: Not interested at present.
- Budget: Not discussed.
- Sales status:

  Not currently interested

- Next action: Do not treat this as an active sales opportunity. Retain the business in the prospect records for possible future engagement.

3. Boyos Bite Restaurant

- Contact: Owner.
- Problem confirmed: The restaurant lacks an online food-ordering website. Customers who live far away may find it inconvenient to travel simply to purchase food, while competing restaurants may offer delivery.
- Proposed solution: Restaurant website with online ordering and, where feasible, delivery coordination.
- Interest: Interested but uncertain about proceeding.
- Budget: Not discussed.
- Sales status:

  Demonstration requested

- Next action: Show a working restaurant ordering example, including menu display, order submission and customer convenience. Explain how delivery arrangements would work.

4. Next Level Beauty Parlour

- Contact: Owner.
- Problem confirmed: Limited business exposure and customer reach.
- Proposed solution: Professional portfolio website showcasing hairstyles, previous work, services and contact information.
- Interest: Interested, but not strongly willing at this stage.
- Purchasing capacity: The business is considered capable of purchasing based on the direct assessment.
- Budget: Not discussed.
- Sales status:

  Demonstration requested

- Next action: Present a visual portfolio example and explain how customers could discover the business and view its work before making enquiries.

5. G's Sip and Bite

- Contact: Owner.
- Problem confirmed: Limited business exposure.
- Proposed solution: Business website with food and beverage information and online ordering.
- Interest: Interested and willing to explore the solution.
- Budget: Not discussed.
- Sales status:

  Demonstration requested

- Next action: Demonstrate an online menu and ordering process, then establish the owner's preferred features and requirements.

6. Peesis Services

- Contact: Owner.
- Problem confirmed: Low business exposure.
- Proposed solution: Professional business portfolio website showcasing the company's services and contact information.
- Interest: Interested and willing to explore the solution.
- Budget: Not discussed.
- Sales status:

  Demonstration requested

- Next action: Demonstrate a professional company website and explain how prospective customers can learn about the services and make enquiries.

5.2 Primary research summary

5

Interested organisations

5

Demonstrations requested

1

Not currently interested

0

Confirmed purchases

Pricing position

- Saint Paul's considers the quoted price acceptable.
- The other interested businesses have not discussed budgets.
- No organisation has committed to a purchase.

The five demonstration requests are important because they give Epahubb an opportunity to show its products to people who have already expressed interest. However, a request for a demonstration should not be interpreted as a confirmed sale.

6. Purchasing Capacity and Commercial Readiness

The purchasing assessment below distinguishes between known information and information that still needs to be established.

Organisation	Interest	Capacity information	Budget position	Readiness
Saint Paul's International School	Interested	Approximately 50 students	Quoted price considered acceptable	Demonstration stage
Maggiefrimps Company Limited	Not interested	Not assessed	Unknown	Not active
Boyos Bite Restaurant	Interested, uncertain	Considered capable	Unknown	Demonstration stage
Next Level Beauty Parlour	Interested, less willing	Considered capable	Unknown	Demonstration stage
G's Sip and Bite	Interested	Not assessed	Unknown	Demonstration stage
Peesis Services	Interested	Not assessed	Unknown	Demonstration stage

Commercial interpretation

Saint Paul's currently provides the clearest indication of price acceptance. Boyos Bite and Next Level Beauty Parlour have been assessed as capable of purchasing, but this is not supported by disclosed financial figures. The purchasing capacity of G's Sip and Bite and Peesis Services still needs investigation.

No estimated contract values have been assigned because Epahubb's pricing information and the businesses' budgets have not been established.

7. Prospect Prioritisation

The following ranking is based on the information available from direct conversations, not on assumed revenue.

Priority	Prospect	Reason
1	Saint Paul's International School	Confirmed operational problem, interested decision-maker, estimated 50 students and positive feedback on quoted price
2	G's Sip and Bite	Interested owner and demonstration request
3	Peesis Services	Interested owner and demonstration request
4	Boyos Bite Restaurant	Identified business problem and purchasing capacity, but some uncertainty
5	Next Level Beauty Parlour	Purchasing capacity indicated, but lower willingness
Inactive	Maggiefrimps Company Limited	Not currently interested

The ranking should be reviewed after the demonstrations. A prospect who sees the product, confirms that it solves a real problem and requests a quotation may become a higher priority.

8. Recommended Sales and Customer Acquisition Strategy

8.1 Immediate actions

Epahubb should concentrate on the five interested prospects before spending substantial time pursuing additional leads.

Action	Target prospects	Expected outcome
Demonstrate school management system	Saint Paul's	Confirm requirements and move towards a formal quotation
Demonstrate restaurant ordering website	Boyos Bite and G's Sip and Bite	Establish required features and willingness to pay
Demonstrate portfolio website	Next Level Beauty Parlour	Show how the website can showcase work and generate enquiries
Demonstrate company website	Peesis Services	Establish the services to display and website requirements

8.2 Demonstration approach

Every demonstration should follow four stages:

1. Understand the problem: Ask the prospect to explain how the current process works.
2. Show the solution: Demonstrate only the features that address the problem.
3. Explain the business benefit: Show how the solution could save time, improve customer access or support better management.
4. Agree on the next step: Ask whether the prospect wants a quotation, a further discussion or additional features.

8.3 Expanding the customer base

Epahubb should continue approaching other organisations in the ten identified segments.

Recommended acquisition channels include:

- Direct visits to businesses in Kumasi and the Ashanti Region.
- Referrals from existing business contacts.
- Business associations and chambers of commerce.
- Official business directories.
- Industry and professional associations.
- Demonstrations at business meetings and networking events.

The strongest approach is to identify a specific business problem first, then offer a relevant technology solution.

9. Recommended 30-Day Action Plan

Period	Activity	Expected result
Week 1	Prepare demonstration environments and confirm product features	Ready-to-show products
Week 2	Demonstrate to Saint Paul's, Boyos Bite and G's Sip and Bite	Obtain feedback and requirements
Week 3	Demonstrate to Next Level Beauty Parlour and Peesis Services	Establish scope and purchasing interest
Week 4	Send quotations to interested prospects who approve the proposed scope; continue prospecting	Move qualified opportunities towards sales

Maggiefrimps should remain outside the active follow-up schedule unless its interest changes.

10. Conclusion and Recommendations

The market research identifies ten potential customer segments where Epahubb's technology services may be commercially relevant.

The most concrete opportunities currently come from the six organisations approached directly. Five are interested and have requested demonstrations, while Maggiefrimps Company Limited is not currently interested.

Saint Paul's International School presents the clearest immediate opportunity because its operational challenges have been confirmed, its estimated student population is known, and its response to the quoted price has been positive.

The restaurant and service-business prospects also provide opportunities for website development, online ordering and business visibility solutions. However, their requirements and willingness to pay must be established through demonstrations and further discussion.

Epahubb should prioritise the five demonstrations, document prospect feedback, prepare appropriate quotations and continue identifying organisations in the other customer segments.

The company should also maintain a prospect database that records contact information, business needs, decision-makers, interest level, budget status, follow-up dates and sales outcomes.

The overall recommendation is to focus on converting existing interest into actual demonstrations, quotations and paying customers while continuing to build a wider pipeline of qualified prospects.

Appendix A: Consolidated Prospect Database

Organisation	Segment	Contact / decision-maker	Contact details	Status
Saint Paul's International School	Education	Headmaster	0244673756	Demonstration requested
Maggiefrimps Company Limited	Retail / Distribution	RTI Manager / IT Head	Not provided	Not interested
Boyos Bite Restaurant	Hospitality	Owner	Not provided	Demonstration requested
Next Level Beauty Parlour	SME / Beauty	Owner	Not provided	Demonstration requested
G's Sip and Bite	Hospitality	Owner	Not provided	Demonstration requested
Peesis Services	Transportation	Owner	Not provided	Demonstration requested

Additional research-identified prospects are listed under the relevant segments in Section 4. Their needs and interest have not been confirmed directly.

Research Sources

The following public sources were used to identify organisations and establish their publicly available business information:

- Epahubb Consult official website: Epahubb Consult
- Ghana TVET Service – private vocational institutions: Institution directory
- NAN Company Limited: Company profile
- Giant Group: Company website
- ADB Ghana Limited: Company profile
- GhanaBusinessWeb – Kumasi businesses: Business directory
- Clemonic Company Limited: Company website
- JANO Medical-Surgical Supplies: Company website
- OICG: Organisation contact information

Research limitation: Public listings establish that the additional organisations exist and provide some contact information. They do not establish that these organisations have a current technology problem, are interested in Epahubb's services, have available budgets or have agreed to meet. These points must be verified through direct prospecting.
