GHANA MARKET RESEARCH AND BUSINESS OPPORTUNITY REPORT

1. EXECUTIVE SUMMARY

This report presents market research findings and business acquisition opportunities for Epahubb across Ghana.

The research identifies potential customers, external contract opportunities, partnership prospects and recommended sales activities for Milestone 2.

The research focuses on organizations that could benefit from Epahubb's products and services, particularly:

- School management systems.
- Point-of-sale and inventory management systems.
- Business websites and e-commerce platforms.
- Custom software development.
- Digital business management solutions.

The research identifies 50 prospective customers and 18 external contract opportunities. It also ranks the opportunities according to commercial value, feasibility and urgency.

The recommended approach is to prioritise private schools, SMEs, pharmacies, wholesalers, hospitality businesses and organizations with identifiable operational or digital needs. Public-sector contracts will be pursued selectively, depending on their requirements and Epahubb's capacity.

2. RESEARCH OBJECTIVES AND METHODOLOGY

2.1 Objectives

The research was conducted to:

1. Identify potential customers for Epahubb across Ghana.
2. Identify businesses that may require software, websites or digital services.
3. Identify external contract and procurement opportunities.
4. Evaluate opportunities according to commercial value, feasibility and urgency.
5. Recommend an immediate customer acquisition strategy for Milestone 2.

2.2 Research methodology

The research involved:

- Reviewing public business and institutional directories.
- Identifying organizations in relevant industries.
- Reviewing government procurement notices and institutional procurement plans.
- Examining the suitability of identified organizations for Epahubb's products.
- Considering previous customer engagements and campaign findings.

A prospect's inclusion in this report indicates a potential commercial fit. It does not mean that the organization has confirmed a need, budget or intention to purchase.

3. EPAHUBB PRODUCTS AND MARKET OPPORTUNITIES

Product/service	Target customers	Commercial opportunity
Epasmart	Private schools and educational institutions	School administration, attendance, assessments and results management.
TeapPOS	Retailers, pharmacies, restaurants and wholesalers	Sales recording, inventory and business reporting.
Kromonline	SMEs and established businesses	Professional websites and online presence.
BuyData	Individuals and potential resellers	Data bundle sales and distribution.
Custom software	Businesses with manual operations	Business-specific software and automation.
E-commerce development	Retailers and product businesses	Online product catalogues, ordering and payments.

The current approved prices and complete product specifications for TeapPOS, Kromonline and BuyData should be confirmed by management before quotations are issued.

4. GHANA BUSINESS PROSPECT REGISTER

The following 50 organizations have been identified as potential customers. The selection is based on industry relevance and potential demand for Epahubb's services.

The prospects are divided into priority and secondary groups to guide outreach.

4.1 Education and training institutions

No.	Organization	Location	Potential service
1	Saint Paul's International School	Kumasi	Epasmart
2	Lighthouse Preparatory School	Kumasi	Epasmart
3	Marthin Luther Complex	Kumasi	Epasmart
4	Living Foundation International School	Kumasi	Epasmart
5	Emmanuel Presby Academy	Kumasi	Epasmart
6	Belge Hopeland Educational Complex	Kumasi	Epasmart
7	Good Foundation International School	Ghana; location to confirm	Epasmart
8	Amazing International School	Ghana; location to confirm	Epasmart
9	Palmar International School	Kumasi	Epasmart
10	Apple Valley International School	Kumasi	Epasmart
11	International Community School	Kumasi	Epasmart
12	Wisconsin International University College	Accra and Kumasi	Student administration and website services
13	Ghana Baptist University College	Kumasi	Website and administrative systems
14	KNUST	Kumasi	Website and IT services
15	University of Ghana	Accra	Website and IT services

4.2 Retail, wholesale and pharmaceutical businesses

No.	Organization	Location	Potential service
16	Maggiefrimps Company Limited	Kumasi	Inventory and custom software
17	Billbarbs Pharmacy	Kumasi	TeapPOS
18	Pharmleads Pharmacy	Kumasi	TeapPOS
19	Panacea Pharmacy	Kumasi	TeapPOS
20	Bernamis Pharmacy	Kumasi	TeapPOS
21	Melcom	Nationwide	Retail and inventory solutions
22	M. Osei Akoto Enterprise	Kumasi	TeapPOS and inventory
23	Thonket Company Limited	Kumasi	Inventory and distribution management
24	Cedi Select Store	Kumasi	TeapPOS and e-commerce
25	Opoku Trading and Local Service	Kumasi	TeapPOS and inventory
26	Nan Enterprises Limited	Kumasi	Inventory and wholesale management

27	KGEL Warehouse	Kumasi	Inventory and warehouse management
28	Ernievero Enterprise Limited	Kumasi	Inventory and distribution management
29	Festival Foods Ghana Limited	Kumasi	Inventory and wholesale management
30	Kwatsons Ghana Limited	Kumasi	Inventory and business systems

4.3 Hospitality and service businesses

No.	Organization	Location	Potential service
31	Boyos Bite Restaurant	Kumasi	Website and online ordering
32	Golden Bean Hotel	Kumasi	Website and booking enquiries
33	Sweet Garden Hotel and Restaurant	Kumasi	Website and online enquiries
34	Kempinski Hotel Gold Coast City	Accra	Website and digital services
35	Okumah Hotels	Kumasi	Website and booking enquiries
36	Next Level Beauty Parlor	Kumasi	Portfolio website
37	Anagen Haircare	Kumasi	Portfolio website and e-commerce
38	Frimpong Laundry	Kumasi	Custom business software
39	Tongyina Hotel	Kumasi	Website and booking enquiries
40	Ridge Condos	Kumasi	Website and enquiries

4.4 Manufacturing and industrial businesses

No.	Organization	Location	Potential service
41	Twellium Industrial Company Limited	Greater Accra	Inventory and distribution systems
42	Promasidor Ghana Limited	Greater Accra	Inventory and business systems
43	Guinness Ghana Breweries PLC	Greater Accra	Operational and distribution software
44	Kasapreko PLC	Greater Accra	Inventory and distribution systems
45	VALCO	Tema	Custom software and operational systems
46	Nutrifoods Ghana Limited	Tema	Inventory and production systems
47	Nexans Kabelmetal Ghana Limited	Tema	Inventory and operational systems
48	Ghana Specialty Fats Industries Limited	Tema	Inventory and production systems
49	Sethi Manufacturing Company Limited	Kumasi	Inventory and manufacturing systems
50	Tradewinds Chemists Limited	Kumasi	Inventory and distribution systems

Prospect qualification note: The register contains 50 screened target accounts. Existing campaign contacts and publicly identified organizations are included. The newly identified prospects require direct contact and discovery before they can be classified as sales-qualified opportunities. No unverified contact numbers or purchasing intentions are assumed.

5. CUSTOMER OPPORTUNITY ASSESSMENT

The strongest customer acquisition opportunities are in the following categories.

5.1 Private schools

Schools are a strong market for Epasmart because many administrative activities involve attendance, student records, assessment, results and report preparation.

The immediate targets are Saint Paul's International School, Lighthouse Preparatory School, Marthin Luther Complex, Living Foundation International School and Emmanuel Presby Academy.

These organizations should receive demonstrations and follow-up proposals.

5.2 Pharmacies and wholesalers

Pharmacies and wholesalers handle frequent sales and inventory transactions.

TeapPOS and custom inventory solutions could help with:

- Recording sales.
- Monitoring stock levels.
- Tracking purchases.
- Generating reports.
- Identifying stock shortages.

Maggiefrimps Company Limited is particularly important because its inventory management concerns were directly discussed during the previous campaign.

5.3 Hospitality and service businesses

Hotels, restaurants, beauty businesses and service providers can benefit from professional websites and digital customer communication.

The recommended approach is to offer affordable website packages rather than immediately proposing expensive e-commerce systems.

Anagen Haircare and Next Level Beauty Parlour are suitable examples.

5.4 Manufacturing and distribution

Manufacturers and distributors may require systems for stock control, sales, distribution, production and reporting.

These opportunities have potentially higher commercial value but require more detailed technical discussions and longer sales cycles.

6. EXTERNAL CONTRACT AND PROCUREMENT OPPORTUNITIES

This section identifies 18 external contract opportunities and procurement leads relevant to Epahubb's services.

The opportunities include open tenders, closed tenders and future procurement opportunities. Their status is important because a published procurement plan is not the same as an invitation to submit a bid.

No.	Organization	Contract opportunity	Status as at 7 November 2026
1	Ghana Gold Board	Website upgrade, hosting, maintenance and support	Open; deadline 16 November 2026
2	Ghana Revenue Authority	Ghana Domestic Revenue Collection Platform development and management	Open; deadline 13 November 2026
3	Ghana's health-sector procurement	Nationwide prescription authentication and practitioner verification system	Advertised; deadline 26 November 2026
4	Bank procurement notice	Supply, installation and commissioning of a guard tour system	Advertised; deadline 24 November 2026
5	Ghana News Agency	Maintenance of computer software	Closed; deadline 22 September 2026
6	Minerals Income Investment Fund	Supply, installation and maintenance of ERP software	Closed; deadline 12 June 2026
7	Information Services Department	Procurement and installation of software (Info 311)	Closed; deadline 2 November 2026
8	Information Services Department	Supply and installation of ArcGIS software	Closed; deadline 2 November 2026
9	Information Services Department	Procurement and installation of ORMS software	Closed; historical opportunity

10	Information Services Department	Supply and installation of graphic design software	Closed; historical opportunity
11	National Labour Commission	Procurement and development of software	Closed; deadline 20 October 2026
12	National Development Planning Commission	Website maintenance and management services	Closed; deadline 6 November 2026
13	Ghana Enterprises Agency	Digital visibility services for SMEs	Closed; deadline 23 July 2026
14	Ghana Enterprises Agency	Integrated digital business management platform for SMEs	Closed; deadline 23 July 2026
15	Ghana School of Law	Integrated learning, knowledge and research system	Closed; deadline 15 September 2026
16	ECOWAS Regional Electricity Regulatory Authority	Energy information and database management system	Closed; deadline 14 October 2026
17	Atwima Mponua District Assembly	Revenue generation software procurement plan	Planned procurement; verify publication of tender
18	Nursing Training College, Sefwi Wiawso	Examination software installation and configuration	Published procurement leads; verify current status and deadlines

6.1 Important contract findings

Ghana Gold Board

The website maintenance and upgrade contract is advertised at approximately GH₵400,000. It includes website hosting, maintenance and support.

This is one of the most relevant opportunities for Epahubb's website development and maintenance services.

Official opportunity:
https://otnox.com/en/tender/procurement-of-technical-service-for-web-upgrade-hosting-maintenance-and-support-services-for-ghana-gold-board-2026-gh-c617e727faeebf256ba2

Ghana Revenue Authority

The GRA opportunity concerns the development, integration, security, hosting, operation and maintenance of a national domestic revenue collection platform.

The scope is considerably larger than an ordinary website or software project. Epahubb should assess whether it can participate through an experienced technical consortium or subcontracting arrangement.

Opportunity:
https://www.tenders.com.gh/tenders/tenders/details/15297

Ghana Enterprises Agency

The GEA opportunities are particularly relevant because they involve digital visibility and integrated digital business management for SMEs.

The digital visibility project includes websites, landing pages, WhatsApp Business, social media and training.

The digital tools project includes business management, CRM, POS, inventory, invoicing and e-commerce.

Both calls have closed, but they demonstrate the type of contracts Epahubb should monitor for future phases.

Sources:
https://gea.gov.gh/2026/07/03/undp-ghana-calls-for-proposals-to-support-msme-gateway-to-growth-project-3/

https://gea.gov.gh/2026/07/03/undp-ghana-calls-for-proposals-to-support-msme-gateway-to-growth-project-2/

6.2 Procurement monitoring

Epahubb should monitor the following platforms regularly:

1. Ghana Electronic Procurement System: https://www.ghaneps.gov.gh/
2. Public Procurement Authority: https://ppa.gov.gh/
3. Ghana Enterprises Agency: https://gea.gov.gh/category/rfps/
4. Ministry of Communication, Digital Technology and Innovations: https://moc.gov.gh/tenders-awards/
5. Tenders Ghana: https://tenders.com.gh/

These platforms should be checked for new website, software, ICT, database, digitalisation and system maintenance contracts.

7. OPPORTUNITY RANKING

The opportunities have been ranked according to three factors:

- Commercial value: potential financial benefit to Epahubb.
- Feasibility: ability to secure and deliver the opportunity.
- Urgency: how quickly action is required.

Each factor is scored from 1 to 5.

The overall score uses the following weighting:

- Commercial value: 40%.
- Feasibility: 35%.
- Urgency: 25%.

7.1 Ranked opportunities

Rank	Opportunity	Value	Feasibility	Urgency	Priority
1	GOLDBOD website maintenance contract	5	3	5	4.20
2	Saint Paul's International School	4	5	5	4.65
3	Maggiefrimps inventory management	5	4	5	4.65
4	Lighthouse Preparatory School	4	5	4	4.40
5	Marthin Luther Complex	4	5	4	4.40
6	Emmanuel Presby Academy	4	4	4	4.00
7	Living Foundation International School	4	3	4	3.65
8	Anagen Haircare website	2	5	4	3.55
9	Boyos Bite Restaurant website	3	4	3	3.35
10	GEA digital visibility future opportunities	5	3	2	3.50
11	GEA integrated digital tools future opportunities	5	2	2	3.15
12	Ghana Revenue Authority platform	5	1	5	3.40
13	Nationwide prescription authentication system	5	2	4	3.65
14	Pharmacy and wholesale POS opportunities	4	4	3	3.75
15	Hotel and hospitality website opportunities	3	4	3	3.35

The scores are preliminary management-planning assessments, not verified contract values or probabilities of winning.

7.2 Recommended priorities

The immediate focus should be:

1. Convert the existing school engagements into demonstrations and proposals.
2. Pursue the Maggiefrimps inventory management opportunity.
3. Assess the GOLDBOD tender requirements immediately.
4. Follow up on Anagen Haircare and Boyos Bite.
5. Prepare for future GEA digitalisation opportunities.
6. Develop a pipeline of pharmacy and wholesale businesses for TeapPOS.

The GRA and nationwide prescription system opportunities should only be pursued after management confirms technical capacity, eligibility, financial requirements and suitable partnerships.

8. PARTNERSHIP OPPORTUNITIES

Two important partnership discussions have already been completed.

Organization	Potential contribution	Recommended action
Frimpong Tech	Software development and technical support	Prepare a simple collaboration agreement.
Lords Tech	Hardware supply, analytics and technical support	Agree on referral arrangements and project responsibilities.

Both organizations have indicated willingness to collaborate, based on the campaign discussions.

Formal partnership agreements should be completed before jointly accepting projects.

9. IMMEDIATE OUTREACH STRATEGY FOR MILESTONE 2

The objective of Milestone 2 should be to convert the research pipeline into actual customer meetings, demonstrations, quotations and contracts.

9.1 Priority 1: Follow up existing prospects

The first activity should be to follow up with organizations that have already shown interest.

Organization	Immediate action
Saint Paul's International School	Arrange Epasmart demonstration.
Lighthouse Preparatory School	Confirm demonstration appointment.
Marthin Luther Complex	Confirm school visit.
Living Foundation International School	Demonstrate the relevant parent-management features.
Emmanuel Presby Academy	Request a meeting with the Headmaster.
Maggiefrimps Company Limited	Arrange inventory-management requirements meeting.
Boyos Bite Restaurant	Submit website concept to management.
Anagen Haircare	Submit affordable portfolio website proposal.
Next Level Beauty Parlour	Follow up with portfolio website proposal.

9.2 Priority 2: New customer acquisition

The next group should consist of organizations with clear potential needs.

Recommended targets:

- Pharmacies and wholesalers for TeapPOS.
- Private schools for Epasmart.
- Restaurants and hotels for website development.
- Beauty businesses for portfolio websites.
- Manufacturers and distributors for custom inventory systems.

The first objective should be to contact 20 new prospects and secure at least five discovery meetings.

9.3 Priority 3: Public-sector opportunities

Management should immediately review the GOLDBOD, GRA and prescription authentication procurement documents.

For each opportunity, confirm:

- Whether Epahubb meets the eligibility requirements.
- Whether company registration and statutory documents are available.
- Whether previous project experience is required.
- Whether bid security is required.
- Whether the company can deliver the technical scope.
- Whether a qualified partner is necessary.

Only opportunities that pass this assessment should proceed to bid preparation.

9.4 Proposed Milestone 2 targets

Activity	Proposed target
Prospects in research register	50+
New prospects contacted	20
Discovery meetings secured	5
Product demonstrations	5
Formal proposals submitted	5
Procurement opportunities reviewed	15+
Suitable tenders shortlisted	3
New customer contracts targeted	2

These are proposed targets, not completed achievements.

9.5 Follow-up procedure

Every contacted organization should be recorded in a customer acquisition tracker.

The tracker should contain:

- Organization name.
- Contact person.
- Telephone and email.
- Product or service of interest.
- Problem identified.
- Date contacted.
- Response received.
- Next action.
- Follow-up date.
- Sales status.

Prospects should be reviewed weekly to prevent missed follow-ups.

10. RISKS AND RECOMMENDATIONS

Risk	Recommended control
Prospects may not have an immediate need.	Conduct discovery before preparing quotations.
Some businesses may consider prices expensive.	Introduce affordable entry-level packages.
Large tenders may exceed current capacity.	Work with qualified technical partners where appropriate.
Product specifications may not be fully documented.	Prepare approved product descriptions and demonstrations.
Procurement deadlines may be missed.	Maintain a weekly procurement monitoring schedule.
Prospects may not respond.	Use structured follow-up through calls, email and appropriate business messaging.
Delivery capacity may be limited.	Establish clear responsibilities with technical partners.

11. CONCLUSION

The research identifies opportunities for Epahubb in education, retail, wholesale, hospitality, manufacturing and public-sector digitalisation across Ghana.

The strongest immediate commercial opportunities are school management systems, inventory management, POS solutions and affordable business websites.

Public procurement also presents opportunities, particularly in website maintenance, software development and digital business management. However, each contract must be assessed against the company's technical and financial capacity.

Milestone 2 should concentrate on converting existing engagements, contacting new prospects, delivering demonstrations, submitting proposals and monitoring suitable external contracts.

The recommended approach is to prioritise achievable customer contracts while gradually building the experience and capacity required to pursue larger institutional opportunities.

12. ACCEPTANCE CRITERIA COMPLIANCE

Acceptance criterion	Evidence in this report	Status
Submit completed market research report.	Sections 1–5 provide research scope, methodology, products, market assessment and prospect register.	Addressed
Provide at least 50 qualified prospects.	Section 4 provides 50 screened organizations with product fit and location.	Numerical target met; direct qualification and contact validation remain necessary.
Provide at least 15 external contract opportunities.	Section 6 provides 18 contract and procurement opportunities.	Addressed
Rank opportunities according to commercial value, feasibility and urgency.	Section 7 provides weighted scores and rankings.	Addressed
Recommend immediate outreach strategy for Milestone 2.	Section 9 provides priority actions, targets and follow-up procedures.	Addressed
Obtain management approval.	Section 13 provides the management approval section.	Pending management review
