MARKET RESEARCH REPORT

Task ID: TSK-2026-0087
Task: Conduct Market Research and Identify Target Customer Segments
Company: Epahubb Consult
Target Market: Ghana
Research Date: 5 November 2026

1. Executive Summary

The research aims to find and identify possible segments, industries or organizations within Ghana that may be interested in the technology products/services offered by Epahubb Consult.

The research identifies ten major customer segments: educational institutions, retail and wholesale businesses, SMEs, healthcare facilities, hospitality businesses, financial institutions, manufacturing companies, logistics businesses, NGOs and real estate companies.

The results indicate that private schools, retail businesses and established SMEs should be prioritized because their technology requirements align closely with Epahubb's existing products and services.

The approach recommended is to build a qualified prospect database, identify decision-makers, conduct targeted outreach, demonstrate relevant products and develop long-term customer relationships.

2. Company Overview

Epahubb Consult is a Ghanaian technology company based in Kumasi. Its publicly advertised services include:

- Software development.
- Website development.
- Mobile application development.
- UI/UX design.
- IT consulting.
- Cybersecurity.
- Network solutions.
- Graphics design.
- IT integration and deployment.
- AI integration and business automation.

Its publicly documented software products and solutions include:

- **Epasmart:** School management system.
- **TeapPOS:** Point-of-sale management system.
- **TeaHRM / Epahubb HRM:** Human resource management system.
- **BuyData:** Data bundle purchasing platform.
- **TruFunder:** Funding and investment platform.
- **Kromonline:** Digital platform.
- Custom CRM and business software solutions.

These products and services create opportunities to serve organizations across multiple industries.

3. Ghana Market Opportunity

Ghana presents opportunities for technology providers due to the increasing adoption of digital communication, online services and electronic financial transactions.

The 2024 Integrated Business Establishment Survey conducted by the Ghana Statistical Service provides a national framework for identifying businesses across economic sectors.

The National Communications Authority reported 30.5 million mobile internet subscriptions in Q2 2026, demonstrating the growing importance of digital connectivity.

Furthermore, the Bank of Ghana's National Payment Systems Strategy 2025–2029 reports that 81% of Ghanaian adults had an account with a financial institution, including mobile money providers, according to the 2024 Global Findex Report.

These developments create opportunities for websites, mobile applications, digital payments, business automation and cloud-based management systems.

4. Identified Customer Segments

4.1 Educational Institutions

Potential customers: Private basic schools, senior high schools, universities, TVET institutions and educational groups.

Needs and challenges:

- Manual student registration and admissions.
- Difficulty managing school fees.
- Inefficient attendance tracking.
- Manual examination and reporting processes.
- Poor communication between parents and schools.
- Difficulty managing teachers and academic records.

Recommended solutions: Epasmart, custom school management systems, school websites, mobile applications and IT support.

Decision-makers: School proprietors, headteachers, principals, directors and school administrators.

Commercial attractiveness: Very high. Schools have recurring administrative requirements and potential for subscription-based revenue.

4.2 Retail and Wholesale Businesses

Potential customers: Supermarkets, pharmacies, electronics shops, clothing retailers, wholesalers and distributors.

Needs and challenges:

- Manual sales recording.
- Inventory management difficulties.
- Stock discrepancies.
- Poor revenue reporting.
- Inefficient checkout processes.
- Difficulty managing multiple branches.

Recommended solutions: TeapPOS, inventory management software, e-commerce websites, payment integration and business analytics.

Decision-makers: Business owners, managing directors, store managers and finance managers.

Commercial attractiveness: Very high. Daily transactions and inventory requirements create opportunities for software subscriptions, implementation and support.

4.3 Small and Medium-Sized Enterprises

Potential customers: Consulting firms, marketing agencies, trading companies, professional service providers, start-ups and growing businesses.

Needs and challenges:

- Limited online presence.
- Poor customer relationship management.
- Manual invoicing and record-keeping.
- Difficulty tracking sales leads.
- Repetitive administrative processes.

- Limited business automation.

Recommended solutions: Business websites, CRM systems, custom software, mobile applications and workflow automation.

Decision-makers: Founders, CEOs, managing directors and business owners.

Commercial attractiveness: Very high. SMEs represent a broad market with opportunities for affordable and scalable technology solutions.

4.4 Healthcare Facilities

Potential customers: Private hospitals, clinics, diagnostic laboratories, medical centers and pharmacy groups.

Needs and challenges:

- Manual patient registration.
- Poor appointment management.
- Inefficient billing.
- Disorganized patient records.
- Cybersecurity vulnerabilities.
- Limited online appointment services.

Recommended solutions: Healthcare management systems, appointment platforms, websites, secure databases and network solutions.

Decision-makers: Hospital owners, medical directors, hospital administrators and IT managers.

Commercial attractiveness: High. Healthcare organizations require reliable systems, data protection and ongoing technical support.

4.5 Hospitality Businesses

Potential customers: Hotels, guesthouses, restaurants, resorts, catering companies and event centers.

Needs and challenges:

- Manual reservations.
- Inefficient billing.
- Poor customer database management.
- Limited online visibility.
- Difficulty coordinating operations.

Recommended solutions: Booking platforms, websites, POS systems, customer management software and branding.

Decision-makers: Hotel owners, restaurant owners, general managers and operations managers.

Commercial attractiveness: High. Digital solutions can improve customer experience and operational efficiency.

4.6 Financial Institutions and Fintech Companies

Potential customers: Rural banks, microfinance institutions, savings and loans companies, fintech start-ups and investment firms.

Needs and challenges:

- Secure transaction processing.
- Customer onboarding.
- Customer data management.
- Payment integration.
- Cybersecurity risks.
- Digital service delivery.

Recommended solutions: Fintech applications, payment platforms, CRM systems, secure mobile applications and cybersecurity services.

Decision-makers: Managing directors, CTOs, IT directors, operations managers and security officers.

Commercial attractiveness: Medium–high. Projects may be commercially valuable, although procurement and regulatory requirements can lengthen sales cycles.

4.7 Manufacturing and Agro-processing Companies

Potential customers: Food processors, beverage manufacturers, packaging companies, pharmaceutical manufacturers and agricultural processing businesses.

Needs and challenges:

- Poor inventory visibility.
- Manual production records.
- Warehouse management difficulties.
- Inefficient reporting.
- Limited integration between departments.
- Network infrastructure challenges.

Recommended solutions: ERP systems, inventory management software, production tracking applications, network solutions and IT support.

Decision-makers: Managing directors, production managers, plant managers and IT managers.

Commercial attractiveness: High. Customized systems can address complex operational requirements and create opportunities for long-term support.

4.8 Logistics and Transportation Companies

Potential customers: Courier companies, freight forwarders, transport operators, delivery companies and warehousing businesses.

Needs and challenges:

- Manual delivery tracking.
- Poor fleet management.
- Difficulty assigning deliveries.
- Inefficient driver communication.
- Limited customer visibility.

Recommended solutions: Fleet management systems, delivery applications, customer tracking portals and mobile applications.

Decision-makers: Business owners, logistics managers, fleet managers and operations directors.

Commercial attractiveness: High. Technology can improve delivery coordination and operational efficiency.

4.9 NGOs and Development Organizations

Potential customers: Local NGOs, international NGOs, foundations and community-based organizations.

Needs and challenges:

- Manual beneficiary records.
- Inefficient project reporting.
- Poor data management.
- Difficulty monitoring project performance.
- Limited online visibility.

Recommended solutions: Management information systems, reporting dashboards, data collection applications, websites and database solutions.

Decision-makers: Executive directors, program managers, project coordinators and procurement officers.

Commercial attractiveness: Medium–high. Project-based technology requirements provide opportunities, subject to funding and procurement availability.

4.10 Real Estate and Construction Companies

Potential customers: Real estate developers, estate agencies, property management companies and construction firms.

Needs and challenges:

- Manual property listing management.
- Poor customer lead tracking.
- Inefficient property marketing.
- Difficulty managing documentation.
- Poor communication with prospective buyers.

Recommended solutions: Real estate websites, property listing platforms, CRM systems and project management software.

Decision-makers: Managing directors, property developers, estate agency owners and sales managers.

Commercial attractiveness: Medium–high. Websites and CRM platforms can support customer acquisition and sales operations.

5. Commercial Attractiveness Ranking

Rank	Segment	Attractiveness
1	Private educational institutions	Very high

2	Retail and wholesale businesses	Very high
3	SMEs	Very high
4	Healthcare facilities	High
5	Hospitality businesses	High
6	Manufacturing companies	High
7	Logistics companies	High
8	Real estate companies	Medium–high
9	Financial institutions	Medium–high
10	NGOs	Medium–high

The ranking considers product-market fit, purchasing potential, recurring revenue opportunities, business needs and likely sales complexity. It is a strategic assessment rather than a measured conversion ranking.

6. Geographic Targeting

The recommended initial target locations are:

1. **Kumasi:** Private schools, retailers, healthcare facilities, SMEs and manufacturing businesses.
2. **Accra and Tema:** Corporate organizations, financial institutions, logistics businesses and SMEs.
3. **Sunyani:** Schools, clinics, retailers and growing businesses.
4. **Takoradi:** Manufacturing, hospitality and logistics companies.
5. **Cape Coast:** Educational institutions, hospitality and healthcare facilities.

6. **Koforidua:** Schools, retailers and SMEs.
7. **Tamale:** Educational institutions, NGOs, healthcare and trading businesses.

Kumasi should be the starting point because it is Epahubb's operating base. Accra and Tema should be the next expansion markets.

7. Customer Acquisition Strategy

Prospect Database Development

Develop a database containing:

- Organization name.
- Industry.
- Location.
- Website.
- Contact person's name.
- Decision-maker's position.
- Business email and phone number.
- Identified technology challenge.
- Recommended Epahubb product or service.
- Estimated sales potential.
- Outreach status.
- Follow-up date.

Targeted Marketing

Use industry-specific marketing messages rather than generic advertisements.

Examples:

- Demonstrate Epasmart to school administrators.
- Demonstrate TeapPOS to retailers.

- Present CRM and automation solutions to SMEs.
- Present secure management systems to healthcare facilities.
- Present custom software solutions to logistics and manufacturing businesses.

Product Demonstrations

Arrange demonstrations and discovery meetings to understand prospective customers' needs and show how Epahubb's solutions can address them.

Strategic Partnerships

Develop relationships with business associations, school networks, SME organizations, professional associations and business consultants to generate referrals.

Recurring Revenue

Introduce suitable maintenance, hosting, technical support, security monitoring and software upgrade packages to generate recurring revenue.

8. Recommended 90-Day Action Plan

Period	Activity	Expected output
Days 1–15	Identify and profile potential customers	Qualified prospect database
Days 16–30	Conduct targeted outreach	Meetings and demonstrations
Days 31–45	Understand requirements and qualify prospects	Sales opportunities
Days 46–60	Submit proposals and quotations	Formal proposals
Days 61–75	Negotiate and follow up	Progressing opportunities
Days 76–90	Close deals and onboard customers	New customers and revenue

9. Key Recommendations

1. Prioritize private schools, retail businesses and established SMEs.

2. Position Epasmart and TeapPOS as key product-led acquisition opportunities.
3. Introduce affordable and scalable solutions for SMEs.
4. Focus outreach on owners, directors and authorized purchasing decision-makers.
5. Build a verified prospect database covering different regions of Ghana.
6. Use product demonstrations to communicate business value.
7. Offer recurring support and maintenance packages.
8. Track leads, meetings, proposals, conversions and revenue generated.

10. Conclusion

The research identifies significant business development opportunities for Epahubb Consult across ten customer segments in Ghana.

Private educational institutions, retail and wholesale businesses, and established SMEs are recommended as the initial acquisition priorities because of their alignment with Epahubb's existing products and services.

By combining targeted prospecting, decision-maker engagement, product demonstrations, strategic partnerships and ongoing technical support, Epahubb can strengthen its customer acquisition strategy and establish sustainable revenue streams.
